# Ionpure® LX-X Industrial Continuous Electrodeionization (CEDI) Modules

#### Ionpure® LX-X - Industrial CEDI Module

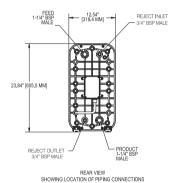

The lonpure® LX-X industrial modules generate mixed bed deionized water through electrodeionization and are specifically designed for industrial applications. lonpure® modules consistently deliver maximum reliability and superior performance for power, HPI/CPI, general electronics, food and beverage and laboratory applications without regeneration downtime.

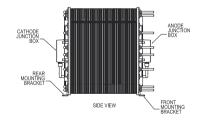

### **LX-X Series Features**

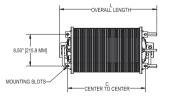

- Double O-ring seal guarantees leak-free operation
- Generate mixed-bed quality deionized water without the use of chemicals
- No need for acid/caustic, neutralization system or exchangable DI tanks
- Continuous production instead of batch, with consistent quality
- Superior electrical isolation
- 100 psi (7 bar), 113°F (45°C) continuous operation
- Patented "all-filled" concentrating compartments eliminate recirculation pump and brine injection
- Significantly lower operating costs, than conventional ion exchange
